

Elm Fork

## Beekeepers Association

### General Meeting Agenda, July 19, 2018

**Mission: To share information and provide education to our members and community about bees and beekeeping. To promote responsible beekeeping practices, through training and education, resulting in effective management of diseases, pests, and other environmental issues.**

- **Welcome and Introduction to meeting**
  - Jan Hodson – President
  - Pat C de Baca – Vice President
  - Secretary – Barbara Henderson
  - Treasurer – Julie Haza
  - Webmaster – Byron Compton
- **Need other board members and committees**
  - Hospitality
  - Communications
- **Business**
  - TBA conference
  - We have a Bank Account and are now taking dues \$25
  - New members get a free year TBA Membership
  - Training classes, Mentor program after first training class
  - Monthly Speakers (your suggestions needed)
  - Extraction party next year
  - Xmas party this year
- **July Monthly Tips**
  - Check for full supers. You can harvest when the honey is at least 80% capped and passes a shake test. Leave honey in the brood boxes for the bees.
  - Allow bees to clean up your supers but remove them quickly if the nectar flow has stopped.
  - Use a fume board, bee brush, or bee blower instead of smoke to remove bees to keep the honey from tasting like smoke.
  - Bottle in a clean environment. If selling, must have labels with beekeepers contact info, weight, and state small beekeepers uninspected facility statement.
  - Freeze empty frames of comb for several days to kill any wax moth larva before storing.
  - Put frames in plastic bags with paradichorobenzene (PDB) to store. *Caution! Be sure to only use PDB crystals and not moth balls (naphthalene). Moth ball will contaminate the wax and kill your bees when supers are returned to the hive.*
  - Check for swarm and supersedure cells
  - Check honey, pollen and brood pattern on frames. My girls are short on pollen and have been hitting the pollen feeders hard.
  - Keep your girls cool! Provide a close clean water source and ventilation.
  - Robber flies are bad this year. Swat them!

- **A few currently blooming nectar plants:**
  - **Crapemyrtle Tree (Non-Native, China, Species: Lagerstroemia Indica**
  - **Cucumber, cantaloupe, and watermelon**
  - **Basil**
  - **Take pictures of bees on nectar plants and email to janrhodson@gmail.com**
- **Handy Tips and Tools:**
  - **Check the pH of your syrup. Honey average pH is 3.9 (range 3.4-6.1) My water tested at 8.4! Use pool water test strips, add lemon juice to lower pH. Tip from: Walker Honey Farm**
  - **Make a pollen feeder**
  - **Basic harvest tools**
- **Door prize drawing (need donations)**
- **Program: Pat Tickle, Oklahoma beekeeper**
- **Meeting Close**

**Next meeting August 16<sup>th</sup>, 6 pm social, 6:30 meeting, Landmark Bank**

Training Classes: September 15<sup>th</sup> Basic Beekeeping, Oct 20 - Hive Management and Increases, Nov 17 - Advanced Beekeeping.
